Tower Crane Signs

Area - 32 SF
Wieght - 100 lbs
Maintenance - none, solid state components are not affected by movement or weather.

The Competition

Area - 32 SF
Wieght - 150 lbs
Maintenance - Bulbs & transformers are damaged by movement and weather.

Compare our signs with traditional cabinet signs - both signs have the same surface area of 32 SF - the maximum allowed on most tower cranes. Our process allows us to create a sign almost 2 times larger and more importantly, the logo or text itself is almost 4 times the size.

Aside from a larger sign, ours are lighter and maintenance free with an LED half life of 50k to 100k hours depending on the color - thats 5 to 10 years non stop maintenance free advertising!
